SUMMARY

As a web developer who is curious about new things, I am a goal oriented-planner and a hands-on learner who utilizes diverse methodologies to create productive solutions to the situations at hand.

EXPERIENCE

Web Development Immersive Program

General Assembly, Washington, D.C.   May 2018 - August 2018

- Completed full-stack web development program focused on up-to-date and practical technologies. Developed a portfolio of individually and collaboratively focused, in-class projects, including:
- Built a hangman game using HTML, CSS, and JavaScript.
- Built a Travel Guide application using Node.js, Express, MongoDB, Materialize, HTML, and CSS.
- Used Node.js, Express, MongoDB, React, and Bootstrap to develop an app for GA students to share training experiences with prospective students.
- Built Sell&Buy application using Python, Django, PostgreSQL, Bootstrap, and CSS.

Customer Service Representative   November 2016 - May 2018

Penguin Random House

- Inspected thousands of book orders to ensure they met customer demands.
- Packed and prepared book shipments to maintain high quality during shipment.

Aramark

- Operated cash register managing up to $5k a day.
- Assisted customers throughout Gettysburg as needed.

Fine Wine and Good Spirit

- Operated cash register managing up to $14k a day.
- Assisted hundreds of customers each shift.

R&D Project Coordinator

Delta Electronics, Thailand   April 2005 - May 2008

- Managed a team of 8 of both technical and non-technical members to develop various projects that would then be pushed to production in order to allow customer orders to go through successfully.
- Ensured that customer satisfaction was achieved through personal attention via email and phone which resulted in being the lead trainer on other customer facing projects and new business development.

SKILLS

Languages & Frameworks

HTML
